Town Issues Notification of Water Tank Repairs Being Made

The Batesburg-Leesville Department of Utilities is advising citizens and businesses in the Leesville District of Town that the Granite Street elevated water tank will be taken out-of-service beginning the week of January 19, 2015. The Town has contracted a company to make repairs and paint both the interior and exterior of the tank. The project is scheduled to be completed by mid April. No interruption in water service should be noticed and local residents to the Granite Street area will notice a slight noise increase due to the operations of a diesel auxiliary generator and pneumatic air compressor for sand blasting operations. All work will be performed during normal daylight hours. If anyone notices a change in their water service or has any questions regarding this, please contact the Batesburg-Leesville Water Plant at (803) 532-6410.
